VOLUME 6 NUMBER 1 SPRING 1985

CONTENTS

Articles

Senescent change in tissue weight and immunoreactive β-endorphin, enkephalin, and vasopressin in eight regions of C57BL/6J mouse brain and pituitary.
ROGERS, J., W. J. SHOEMAKER, D. G. MORGAN and C. E. FINCH 1

Behavioral effects of phosphatidylserine in the aged Fischer 344 rat: Amelioration of passive avoidance deficits without changes in psychomotor task performance.
CORWIN, J., R. L. DEAN, III, R. T. BARTUS, J. ROTROSEN and D. L. WATKINS 11

Effect of exercise on longevity, body weight, locomotor performance, and passive avoidance memory of C57BL/6J mice.
SAMORAJSKI, T., C. DELANEY, L. DURHAM, J. M. ORDY, J. A. JOHNSON and W. P. DUNLAP 17

Search for DNA alterations in Alzheimer's disease.
SPECTOR, R. and A. KORNBERG 25

Strain comparison of synaptic density in hippocampal CA1 of aged rats.
SCHEFF, S. W., K. J. ANDERSON and S. T. DEKOSKY 29

Epinephrine-induced cyclic AMP production in skin fibroblasts from patients with dementia of Alzheimer type and controls.
VOLICER, L., L. GREENE and F. M. SINEX 35

Aging in the rat medial nucleus of the trapezoid body. III. Alterations in capillaries.
CASEY, M. A. and M. L. FELDMAN 39

Cardiovascular responses to acute footshock stress in adult and aged Fischer 344 male rats.
McCARTY, R. 47

Brief Communications

Effects of dietary choline on memory and brain chemistry in aged mice.
MIZUMORI, S. J. Y., T. A. PATTERSON, H. STERNBERG, M. R. ROSENZWEIG, E. L. BENNETT and P. S. TIMIRAS 51

Drinking by senescent and adult rats in response to regulatory challenges.
MARTIN, J. R., A. FUCHS and J. HARTING 57

Meeting Report

British Pharmacological Society Symposium: Alzheimer's Disease—Central Cholinergic Mechanisms.
CAULFIELD, M. and C. SMITH 61

VOLUME 6 NUMBER 2 SUMMER 1985

CONTENTS

Editorial

5th Anniversary of *Neurobiology of Aging*. v

Articles

Interaction of norepinephrine with Purkinje cell responses to cerebellar afferent inputs in aged rats.
BICKFORD, P. C., B. J. HOFFER and R. FREEDMAN 89

Desglycinamide-9-arginine-8-vasopressin (DGAVP, Organon 5667) in patients with dementia.
PEABODY, C. A., S. THIEMANN, R. PIGACHE, T. P. MILLER, P. A. BERGER, J. YESAVAGE and J. R. TINKLENBERG 95

Release of immunoreactive beta-endorphin in vitro from pituitaries of young and old male rats.
FORMAN, L. J., D. MARQUIS and R. STEVENS 101

Synergistic effects of estrogen and serotonin-receptor agonists on the development of pituitary tumors in aging rats.
WALKER, R. F. and R. L. COOPER 107

Effects of advancing age on hypothalamic neurotransmitter content and on basal and norepinephrine-stimulated LHRH release.
STEGER, R. W., L. V. DEPAOLO and A. M. SHEPHERD 113

Plasma and myocardial catecholamine levels in young and aged rats during halothane anesthesia.
HOFFMAN, W. E., C. SEALS, D. J. MILETICH and R. F. ALBRECHT 117

Brief Communications

Drug induced hypothermia in adult and senescent rats.
MARTIN, J. R., A. FUCHS and J. HARTING 121

Further characterizations of the nature of the behavioral and neurochemical effects of lesions to the nucleus basalis of Meynert in the rat.
ALTMAN, H. J., R. D. CROSLAND, D. J. JENDEN and R. F. BERMAN 125

Review

Neural transplantation: A review of recent developments and potential applications to the aged brain.
GASH, D. M., T. J. COLLIER and J. R. SLADEK, JR. 131

Peer Commentaries

Comments on review by D. M. Gash, T. J. Collier and J. R. Sladek: Transplants to the central nervous system as a therapy for brain pathology
LEVERE, T. E. and N. D. LEVERE 151

Contents continued

Commentary on review by Gash *et al.*:
Potential usefulness and current limitations of neural transplantation in the aged brain.
KATZMAN, R. 152

Repairing neuronal circuits with brain grafts: Where can brain grafts be used as a therapy?
FREED, W. J. 153

Comments on review by Gash *et al.*:
Applications of recombinant DNA techniques.
FINCH, C. 156

Fetal brain tissue transplant techniques: A cautionary note.
STEIN, D. G. 157

Commentary on review by D. M. Gash, T. J. Collier and J. R. Sladek:
The application of neural transplantation to degenerative diseases of the human nervous system.
MANN, D. M. A 160

Braingrafts:
Potential therapy in neurodegenerative diseases and in understanding normal aging in the CNS.
HOFFER, B. J. and T. V. DUNWIDDIE 162

Problems specifically related to grafting to the aged brain.
GAGE, F. H. and A. BJÖRKLUND 163

Neural transplantation vs. central neurotransmitter augmentation in diseases of the nervous system.
HARBAUGH, R. E. 164

Commentary on review by Gash *et al.*:
A clinical perspective on neural transplantation and potential applications to the aged brain.
HAROUTUNIAN, V. and K. L. DAVIS 166

Neural transplantation: A panacea?
MOSS, M. B. and D. L. ROSENE 168

Therapeutic applications of neural transplant technology.
ROGERS, J., S. F. ZORNETZER and M. L. SIMON 169

Authors' Comments

Response to the commentaries on "Neural Transplantation".
GASH, D. M., T. J. COLLIER and J. R. SLADEK, JR. 173

VOLUME 6 NUMBER 3 FALL 1985

CONTENTS

Articles

Power spectral analysis and cortical coupling of EEG for young and old normal adults.
DUSTMAN, R. E., J. A. LAMARCHE, N. B. COHN, D. E. SHEARER and J. M. TALONE 193

Effects of intermittent feeding on neurochemical markers in aging rat brain.
LONDON, E. D., S. B. WALLER, A. T. ELLIS and D. K. INGRAM 199

A Golgi study of hypothalamic transplants in young and old host rats.
KAPLAN, A. S., D. M. GASH, D. G. FLOOD and P. D. COLEMAN 205

Age-associated alteration of serotonergic synaptic neurochemistry in rat rostral hypothalamus.
SPARKS, D. L., W. R. MARKESBERY and J. T. SLEVIN 213

Preservation of accurate spatial memory in aged rats.
BEATTY, W. W., R. A. BIERLEY and J. G. BOYD 219

Indices of neurotransmitter synthesis and release in aging sympathetic nervous system.
PARTANEN, M., S. B. WALLER, E. D. LONDON and A. HERVONEN. 227

Multiple, single-dose naltrexone administrations fail to effect overall cognitive functioning and plasma cortisol in individuals with probable Alzheimer's disease.
POMARA, N., R. ROBERTS, H. B. RHIEW, M. STANLEY and S. GERSHON 233

Effect of age on substance P levels in the rat mesenteric artery and vein.
DUCKLES, S. P. 237

Effects of septal lesion on lordosis response induced by estradiol in middle-aged and old female rats.
LEE, L. R., J. Y. L. YU and M. T. PENG 241

Brief Communication

Single unit activity in frontal cortex and caudate nucleus of young and old rats.
STERN, W. C., W. W. PUGH and P. J. MORGANE 245

Meeting Report

First International Congress of Biomedical Gerontology.

CONTENTS

Editorial v

Articles

Stability of numbers but not size of mouse forebrain cholinergic neurons to 53 months.
HORNBERGER, J. C., S. J. BUELL, D. G. FLOOD, T. H. McNEILL and P. D. COLEMAN 269

Strain differences and laminar localization of structural neurochemical changes in aging rat.
DEKOSKY, S. T., S. W. SCHEFF, C. G. HACKNEY and N. H. BASS 277

Recognition memory in Alzheimer's disease.
HART, S. A., C. M. SMITH and M. SWASH 287

Efficacy of a reduced triazolam dose in elderly insomniacs.
ROEHRS, T., F. ZORICK, R. WITTIG and T. ROTH 293

Subsynaptosomal distribution of calcium during aging and 3,4-diaminopyridine treatment.
PETERSON, C., D. G. NICHOLLS and G. E. GIBSON 297

Altered tubulin distribution in the hypothalamus of aging female C57BL/6J mice.
MAY, P. C. and C. E. FINCH 305

Hypothalamic LHRH in aging rats: Effects of ovariectomy and steroid replacement.
RUBIN, B. S., K. ELKIND-HIRSCH and R. S. BRIDGES 309

Conformational changes in muscarinic receptors may produce diminished cholinergic neurotransmission and memory deficits in aged rats.
LIPPA, A. S., C. C. LOULLIS, J. ROTROSEN, D. M. CORDASCO, D. J. CRITCHETT and J. A. JOSEPH 317

Functional and neurochemical cortical cholinergic impairment following neurotoxic lesions of the nucleus basalis magnocellularis in the rat.
EL-DEFRAWY, S. R., F. COLOMA, K. JHAMANDAS, R. J. BOEGMAN, R. J. BENINGER and B. A. WIRSCHING 325

Quinolinic acid neurotoxicity in the nucleus basalis antagonized by kynurenic acid.
BOEGMAN, R. J., S. R. EL-DEFRAWY, K. JHAMANDAS, R. J. BENINGER and S. K. LUDWIN 331

Brief Communication

Phosphatidylserine increases acetylcholine release from cortical slices in aged rats.
PEDATA, F., L. GIOVANNELLI, G. SPIGNOLI, M. G. GIOVANNINI and G. PEPEU 337

Contents continued

Meeting Report

The fourteenth international summer school of brain research: Aging of the brain and senile dementia.
